About Me

Computer Science enthusiast and final-year engineering student passionate about learning new technologies and building practical projects. Skilled in programming, web development, machine learning, seeking opportunities to contribute to real-world solutions.

Education

BMS College of Engineering

B.E. in Information Science and Engineering; CGPA: 9/10

Relevant Coursework: Object-Oriented Programming, Operating Systems, Database Management Systems, Data Structures & Algorithms, Computer Networks, Software Engineering, Cloud Computing, Machine Learning

Bengaluru, India

Aug 2023 – Present

Padmavati PU College

Pre University College (PUC); Percentage: 88%

Hosur, India

Jun 2021 – Apr 2023

Technical Skills

Languages: C, C++, Python

Operating Systems: Windows 10/11, Ubuntu

Developer Tools: Git, VS Code, Postman, Docker

Frontend: HTML/CSS, JavaScript, React

Backend: Flask, Node.js, Express.js

Database: SQL, MongoDB

Internship

Full Stack Web Development Intern | BharatSkillz (Wisdombharat Edutech Pvt Ltd) 📅 May 2026 – Jul 2026

- Completed an industry-focused internship in Full Stack Web Development, gaining practical experience in frontend and backend technologies.
- Worked on live software projects while developing practical skills in web development, APIs, debugging, and problem-solving.
- Gained hands-on exposure to real-world development workflows, team collaboration, and industry-oriented software engineering practices.

Projects

Real-Time Chat Ledger Web Application | MERN Stack, Socket.io, WebRTC

Jan 2026 – Mar 2026

- Developed a scalable full-stack real-time chat application using the MERN stack.
- Implemented an in-chat ledger system with voice/video calling features for seamless transaction tracking and user interaction, Socket.io for instant communication.
- Enhanced user experience with responsive UI design and efficient real-time data synchronization.

Real-Time Traffic Congestion Detection System | Python, YOLOv5, Flask, OpenCV

Aug 2025 – Oct 2025

- Built a full-stack computer vision web application using YOLOv5 and Flask to detect and track vehicles/pedestrians from uploaded videos and live camera feeds.
- Implemented a custom SORT-based multi-object tracker with per-vehicle speed estimation and real-time traffic congestion classification (Low/Moderate/High).
- Developed automated congestion advisories, time-ranged event reporting, live-camera processing, H.264 video handling, REST APIs, and Flask Blueprints for real-time monitoring.

Extracurricular Activities & Interests

- Member of the Rotaract Club and Volunteered in college fest (UTSAV '25 – BMSCE), assisting in event management and coordination.
- Participated in multiple hackathons, collaborating on projects under time constraints.
- Interests: Kho Kho, Cricket, Watching Mythological Stories, Web Design.

Certifications

- 🏆 **Nutanix Certified Associate 6 (NCA)** – Multicloud Infrastructure | Cloud Computing & Virtualization
- 🏆 **Google Cloud Engineering Certificate** – Google Cloud Career Launchpad | Cloud Deployment & Kubernetes
- 🏆 **Getting Started with Cisco Packet Tracer** – Cisco Networking Academy | Networking Fundamentals
